

BUTTRESS THREAD GROOVE WIDTH GAUGES

CAN BE CUSTOMIZED
ACCORDING TO WORKPIECES

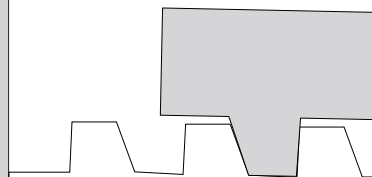

2244-N1

Unit: mm

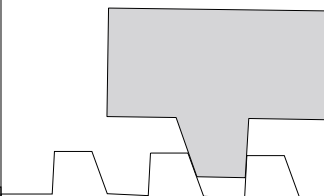

application

Put the Go gauge into measured thread slot, and there should be no gap between the gauge and the bottom of the thread.

Put the No-Go gauge into measured thread slot, and there should be a gap between the gauge and the bottom of the thread.

- Measure groove width of buttress thread
- Supplied with Go and No-Go gauges together

Code	Taper	Number of thread per inch	Remark
2244-W1	1:16	5	Buttress external thread groove width measurement ($\leq 7 \frac{5}{8}$ ")
2244-W2	1:16	5	Buttress external thread groove width measurement ($\geq 8 \frac{5}{8}$ ")
2244-N1	1:16	5	Buttress internal thread groove width measurement ($4 \frac{1}{2}$ "- $13 \frac{3}{8}$ ")
2244-W3	1:12	5	Buttress external thread groove width measurement (≥ 16 ")
2244-N2	1:12	5	Buttress internal thread groove width measurement (≥ 16 ")
