

## GLOSS PLATES

- Used to calibrate work gloss meters
- The high gloss plates are made of polished black glass or other materials.  
The medium and low glossplates are made of ceramic

CUSTOMISED

### SPECIFICATION

Code	5721-LGU	5721-MGU	5721-HGU
Gloss range	low gloss	medium gloss	high gloss
Incidence angle*	20°, 45°, 60°, 75°, 85°		
Material	polished black glass, ceramic, mirror reflective glass etc.		
Flatness (black glass plate)	interference aperture ≤15, partial aperture ≤3		
Spectrum reflection neutral error (ceramic plate)	±12%		
Annual variation	±1GU		
Environment	temperature 5~45°C, relative humidity <85%RH		
Dimension	80×50×11mm		
Weight	according to different materials		

\* Different incidence angles are available according to customer requirements
