

# ELECTRONIC SURFACE PROFILE GAGE

DATA  
OUTPUT

measure peak-to-valley height of blast cleaned surface

2843-10

- Measure peak-to-valley height of blast cleaned surface. If the profile is too low, the adhesion of the coating to the surface will be reduced. If the profile is too high, there is the danger that the profile peaks will remain uncoated, allowing rust spots to occur.
- Meet ASTM D 4417-B
- Zero set block is included, set zero before measurement
- Button function: on/off, zero, inch/mm, absolute/incremental measurement
- CR2032 battery, automatic power off
- Data output
- Stainless steel base
- Optional accessory: data output cable (part no. 7306-40, 7302-SPC3A, 7305-SPC1A)

set zero
